

CHANGING IRIDIUM SIM CARDS

Iridium does not support number portability. In order to change Iridium providers, you need to change SIM cards. It is simple to do. Remove the old SIM card, install the new one, change the phone number label on the phone. Done!
When you need to change SIM cards you will have two options:

1. You can change the SIM cards yourself
2. Send us the phones and we will change them for you

Either way, you'll have the legendary GloboFone kit, not available anywhere else in this industry.

If you want to swap the SIM cards

We send you SIM cards in individual kits to include:

- New SIM card and replacement instructions
- Phone number label for your handset
- Laminated 5x7 Easy Guide with basic phone functionality, dialing pattern instructions and your phone number
- 24/7 customer support card
- Pen, LED flashlight
- All packed in our nylon carrying case (optional)

If you want us to swap the SIM cards

You ship the phones and accessories to us and GloboFone will:

- Test all phones and accessories
- Fully charge each handset
- Insert new SIM card,
- Label the handset with phone number
- Include Easy Guide, 24/7 customer support card, LED flashlight and Pen
- Pack all of the above on our nylon padded carrying case

Here's why it matters:

Your organization has the right to choose the best satellite service provider for your needs. The decision criteria may include one or more of these following:

- Lowest or perceived lowest price
- Past performance
- Client support
- Industry experience
- Industry reputation

Regardless of why, if you need to change your SIM cards to use a different provider than your current provider, it is easy to do. We'll send you complete instructions and phone number labels with the new numbers, or you send us your phones and let our professionals handle it quickly and diligently.

We are here to make things easy for you!

9555 SIM Slot:

Note there is no door, it just slides into place.

The 9575 and 9505A SIM Slot is

actually within the little door. It slides in the door channel and the door snaps closed, locking the SIM in place
